

หน่วยวิจัยและออกแบบเพื่อคนทั้งมวล มหาวิทยาลัยธรรมศาสตร์'s post

During the event, the Faculty of Architecture and Planning, Thammasat University showcased its Universal Design initiatives and officially introduced the UD Audit programme, marking a significant milestone in establishing Thailand's professional Universal Design auditor system.

Developed from over 15 years of research, field investigations, and practical experience, the programme covers legal compliance, accessibility standards, performance-based assessment, facility management, and maintenance auditing. It aims to transform building assessment from merely checking regulatory compliance to evaluating the overall quality of accessibility, usability, and long-term building performance.

The programme is also supported by the publication of "Assessing Accessibility for All," a professional manual refined over the past 15 years to serve as a national reference for training Universal Design auditors and promoting internationally aligned accessibility standards across Thailand.

This initiative reflects a strong partnership among government agencies, academia, and professional networks in advancing an inclusive society where everyone can access, participate, and live independently with dignity—embracing the principle of "Leave No One Behind."
